Precalculus consists of those subjects, skills and insights needed to understand calculus. It includes arithmetic, algebra, coordinate geometry, trigonometry, and most of all, functions – the general concept as well as specific functions. Through the year, the following topics will be addressed; Functions, Polynomial & Rational Functions, Exponential & Logarithmic Functions, Trigonometry, Triangles & Vectors, Polar Coordinates, Parametric Equations, Conic Sections, Sequences & Series, Limits. TEKS are posted on my website if you would like to view them.

Online access – MANDATORY. Students will visit [onramps.instructure.com](http://onramps.instructure.com) to do their summative work.

### THE RULES

BE RESPECTFUL  
BE RESPONSIBLE

### WHAT TO BRING

PENCILS  
COMPOSITION NOTEBOOK  
FOLDER or BINDER
